

## FIBRE BROADBAND CONSENT FORM – RENTAL PROPERTIES

Enable Networks Limited (**Enable**) has received a request to install our fibre broadband services into your rental property.

In order for Enable to start that work we require your consent as property owner. Please review this document in detail, complete the second page and return to Enable.

### Installing fibre broadband at your property

In most cases we install our own network infrastructure from the footpath into a home or building via one or a combination of the following methods.

- a) Surface mounting the fibre cable to a suitable surface such as the railing on a fence.
- b) Burying the fibre cable in a soft surface such as grass or garden.
- c) Burying the fibre cable under a hard surface such as concrete by drilling or digging a trench.

Digging may be required for some of the installation methods. We aim to minimise disruption and will reinstate any surface we've disturbed on a "like for like" basis, for example asphalt where there was asphalt or grass seed where there was grass. We can't guarantee to match surface finish or colour though, and our reinstatement is limited to the surface we've disturbed.

There are some occasions where we can use existing ducting as part of the installation.

- If the property has unused telecommunication duct available, and you can demonstrate ownership of it, we will try to use this duct.
- If Enable, has installed red duct to the property in the past, we will use this duct.

### Enable's commitment to you

We are committed to ensuring our network installation work has minimal impact on your property.

- All work will be carried out to a professional standard in accordance with legal requirements and industry standards.
- We will use the installation method that has the least impact on your property.
- Our contractors will conduct themselves professionally while working on your property.
- We will always try to give reasonable advance notice, including a description of the work and the identity of the contractor who will be sent to carry out the work.
- Our contractors will endeavour to minimise disruptions and will leave your property in a neat and tidy state once the work is complete.

## FIBRE BROADBAND CONSENT FORM – RENTAL PROPERTIES

Please complete and return by email, post or fax.

Order # (if known):

Address of property owned:

---

---

---

As owner of the property referenced above, I give my consent for Enable and its approved contractors to access my property to install and maintain fibre optic cables and related UFB network equipment, as outlined on the first page this consent form. This consent shall continue while such equipment remains at my property.

Enable also has consent to access the same network for repair and/or removal from time to time in the future. I acknowledge that Enable has continuing ownership of the network and equipment they install and agree that it must not be worked on or interfered with without Enable's prior consent. If another entity takes over responsibility for installing the UFB network, then my consent and its terms will apply to that new entity.
