

FIBRE BROADBAND CONSENT FORM – SHARED ACCESSWAY

Enable Networks Limited (**Enable**) has received a request to install our fibre broadband services into a property accessed by a shared accessway, which you are also legally entitled to use to access your property (the **Accessway**).

Before we can connect homes or businesses in your Accessway to our fibre network we need consent from the owner of each property that has a legal entitlement to use the Accessway. This consent gives Enable access to assess, install and maintain fibre optic cables and related equipment. Please review this document in detail, complete the second page and return to Enable.

Installing fibre broadband at your property

In most cases we install our own network infrastructure from the footpath into the relevant home or building via one or a combination of the following methods.

- a) Surface mounting the fibre cable to a suitable surface such as the railing on a fence.
- b) Burying the fibre cable in a soft surface such as grass or garden.
- c) Burying the fibre cable under a hard surface such as concrete by drilling or digging a trench.

Digging may be required for some of the installation methods. We aim to minimise disruption and will reinstate any surface we've disturbed on a "like for like" basis, for example asphalt where there was asphalt or grass seed where there was grass. We can't guarantee to match surface finish or colour and our reinstatement is limited to the surface we've disturbed.

There are some occasions where we can use existing ducting as part of the installation.

- If the properties up the Accessway have unused telecommunication duct available, over which the property owners can demonstrate ownership, we will try to use this duct.
- If Enable has installed red duct to the properties in the past, we will use this duct.

Please note that by providing consent, you are also consenting to any additional work that may be required in the future by Enable's contractors to connect another property or properties accessed using the Accessway.

Please also note that because of the Privacy Act 1993, Enable is not able to advise any details as to which parties in a shared Accessway have or have not provided their consent.

Enable's commitment to you

We are committed to ensuring our network installation work has minimal impact on your property.

- All work on the Accessway will be carried out to a professional standard in accordance with legal requirements and industry standards.
- We will use the installation method that has the least impact on your property.
- Our contractors will conduct themselves professionally while working on your property.
- We will always try to give reasonable advance notice, including a description of the work and the identity of the contractor who will be sent to carry out the work.
- Our contractors will endeavour to minimise disruptions and will leave your property in a neat and tidy state once the work is complete.

FIBRE BROADBAND CONSENT FORM – SHARED ACCESSWAY

Please complete and return by email, post or fax.

Details of the Accessway (i.e. address or name of private right of way):

Order # (if known): _____

Address of property owned on Accessway:

As the authorised property owner, body corporate manager or joint owner of the property referenced above, I give my consent for Enable and its approved contractors to access the Accessway to install and maintain fibre optic cables and related UFB network equipment, as outlined on the first page this consent form. This consent shall continue while such equipment remains under, over or along the Accessway.

Enable also has consent to access the same network for repair and/or removal from time to time in the future. I acknowledge that Enable has continuing ownership of the network and equipment they install and agree that it must not be worked on or interfered with without Enable's prior consent. If another entity takes over responsibility for installing the UFB network, then my consent and its terms will apply to that new entity.
